937-299-7226

Per our telephone conversation of Friday 04 04 2014:

I am *Harold L. Case*, Emergency Management Coordinator for Rains County, Texas. I recently purchased a Uniden BCD536HP scanner for the Rains County Judge's office. I have no need for the thousands of preprogrammed frequencies in the scanner. I need only the communication frequencies we currently employ in the County and the State of Texas Interoperable frequencies, which are employed during major events. I have made numerous attempts to program the frequencies I need into the scanner, unsuccessfully. I am sending the unit and this information in order that you can program the frequencies I need into the scanner.

Rains County Sheriff's Office dispatch, dispatches for all law enforcement agencies in Rains County. This dispatch frequency is P25 digital (standard) 155.790. All law enforcement traffic is passed on this frequency.

Rains County Sheriff's Office dispatch, dispatches fire activities on 155.790 analog. Fire agencies return traffic to dispatch on that same frequency, analog.

I have included the BCD536HP scanner, a check for \$44.00, and a list of the frequencies I need in the scanner in this shipment.

I am currently off work, having recently undergone spinal surgery. Please direct all communication to:

harold@rra-emergency.com
and 1 902 473 2871

Shipping address:

Harold Case
213 RR CR 1388
Emory, Tx 75440

Respectfully:

Harold L. Case
